

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**LISTING OF CLAIMS:**

1. (Previously Presented) A pipe coupling comprising:
  - an elongated housing comprising a first end and a second end, the housing defining an elongated bore therein;
  - a stop located on an inner diameter of the housing, the stop located between the first end and the second ends of the housing, wherein a distance from the stop to one of the first and second ends is at least two times a distance from the stop to the other of the first and second end of the housing;
  - a first cylindrical bore extending from the first end to the stop; and
  - a second cylindrical bore extending from the second end to the stop,wherein an angle between the first cylindrical bore and the second cylindrical bore is about 15 degrees to about 165 degrees, and wherein each of the cylindrical bores are configured to allow a pipe end to advance into the pipe coupling until reaching the stop.
2. (Original) The pipe coupling of Claim 1, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 45 degrees.
3. (Original) The pipe coupling of Claim 1, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 60.
4. (Original) The pipe coupling of Claim 1, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 90.
5. (Original) The pipe coupling of Claim 1, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 120 degrees.

6. (Original) The pipe coupling of Claim 1, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 135 degrees.

7. (Cancelled).

8. (Cancelled).

9. (Cancelled).

10. (Cancelled).

11. (Previously Presented) A pipe coupling consisting of:  
an elongated housing comprising a first end and a second end, the housing defining an elongated bore therein;  
a stop located on an inner diameter of the housing, the stop located between the first end and the second ends of the housing, wherein a distance from the stop to one of the first and second ends is at least two times a distance from the stop to the other of the first and second end of the housing;  
a first cylindrical bore extending from the first end to the stop; and  
a second cylindrical bore extending from the second end to the stop, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 15 degrees to about 165 degrees, and wherein each of the cylindrical bores are configured to allow a pipe end to advance into the pipe coupling until reaching the stop.

12. – 22. (Cancelled).

23. (Previously Presented) A pipe coupling comprising:  
an elongated housing comprising a first end and a second end, the housing defining an elongated bore therein;  
a single stop located on an inner diameter of the housing, the stop located between the first end and the second ends of the housing, wherein a

distance from the stop to one of the first and second ends is at least two times a distance from the stop to the other of the first and second end of the housing;  
a first cylindrical bore extending from the first end to the stop; and  
a second cylindrical bore extending from the second end to the stop,  
wherein an angle between the first cylindrical bore and the second cylindrical bore is about 15 degrees to about 165 degrees.

24. (Previously Presented) The pipe coupling of Claim 23, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 45 degrees.

25. (Previously Presented) The pipe coupling of Claim 23, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 60.

26. (Previously Presented) The pipe coupling of Claim 23, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 90.

27. (Previously Presented) The pipe coupling of Claim 23, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 120 degrees.

28. (Previously Presented) The pipe coupling of Claim 23, wherein the angle between the first cylindrical bore and the second cylindrical bore is about 135 degrees.
